MIRZA NAJ BAIG

PHP/Laravel Backend Developer | Backend Engineer (PHP) | REST API Specialist
Cuttack, India | +91 9937762490 | najmirza7867@gmail.com
LinkedIn: **linkedin.com/najmirza**
Portfolio: najmirza.github.io/Mirza/

PROFESSIONAL SUMMARY

Results-driven **PHP/Laravel Backend Developer with 2.8+ years of experience** delivering high-performance web applications, scalable database architectures, and secure API-driven systems. Proven track record of building **real-time transaction modules**, optimizing MySQL performance by **up to 60%**, and delivering production systems with **99% uptime**. Strong expertise in Core PHP, Laravel ecosystem, RESTful APIs, authentication workflows, and reusable backend components. Recognized for clean coding standards, cross-functional collaboration, and delivering reliable backend solutions for **recharge, MLM, retail, and franchise platforms**.

TECHNICAL SKILLS

1. **Languages & Frameworks:** PHP (Core PHP, Laravel), JavaScript, SQL,HTML5,CSS3
2. **Frameworks Tools:** Laravel,React,Vue, Blade, Bootstrap, jQuery, AJAX, RESTful APIs
3. **Database Skills:** MySQL , Query Optimization , Indexing , Normalization , Migrations & Seeders
4. **Laravel Expertise:** Eloquent ORM & Relationships , Middleware , RESTful APIs & API Resources, Authentication & Authorization , Validation , Caching & Pagination
5. **Tools & AI Productivity:** Git, GitHub, Postman, phpMyAdmin, VS Code, XAMPP, cPanel, Hostinger, **ChatGPT, Google Gemini & GitHub Copilot, debugging, and architectural guidance**

PROFESSIONAL EXPERIENCE

Backend PHP Developer — SCRIPT DEV TECHNOLOGY
Cuttack, MAY 2025 - Present

- Developed **end-to-end backend modules** for dashboards, e-commerce flows, and transaction systems, improving system stability by **30%**.
- Integrated secure **payment & payout workflows** with real-time tracking, reducing transaction failures by **25%**.
- Enhanced API reliability by implementing **validation layers, throttling, and centralized exception handling**.
- Designed optimized MySQL schemas for **wallet, product, and transaction operations**, supporting thousands of concurrent users.
- Collaborated with front-end teams to deliver **seamless UI ↔ API integration**, reducing communication overhead by **40%**.

Backend PHP Developer — ZANTHIUM TECHNOSOFT PVT LTD
Rudrapur , FEB 2023- Mar 2025

- Developed **10+ reusable Core PHP backend modules**, reducing development time by 30%.
- Improved MySQL query performance by **60%** using indexing, normalization, and query refactoring.
- Designed and maintained REST APIs supporting **5,000+ daily active users** with 99% uptime.
- Implemented automated **PHPUnit test cases**, reducing production bugs by **40%**.
- Strengthened authentication and session security, lowering unauthorized login attempts by **40%**.

PROJECTS HIGHLIGHTS

1. **Role-Based Task Management System (Laravel)**

   Laravel | PHP | MySQL | Blade | RBAC | UI/UX

   - Developed a role-based task management system in Laravel with multi-user task assignments, per-user completion tracking, admin dashboards, and a modern glassmorphism UI.
   - Implemented **Role-Based Access Control (RBAC)** with **Admin, Manager, and Member** roles to enforce secure authorization and data access.
   - Built an **Admin Dashboard** displaying real-time metrics including **total users, active projects, teams, and tasks**.
     Github Link: Task-Management-System

2. **Multi-Vendor E-Commerce & Order Management System**

   Laravel, PHP, MySQL, Blade, Livewire, Alpine.js, Tailwind CSS, REST APIs

   - Developed a **Laravel-based Multi-Vendor E-Commerce & Order Management System** with vendor onboarding, product & inventory management, cart-to-checkout workflow, payment integration, vendor payouts, coupons, and admin analytics using role-based access control.
   - Implemented **advanced backend concepts** including Eloquent relationships, database transactions, event-driven order updates, caching for performance optimization, and queue-based email notifications to ensure scalability and reliability.
   - **Github Link: E-commerce**

3. **MLM Commission & Franchise Management System**

   PHP, MySQL, AJAX, jQuery, Bootstrap

   - Engineered multi-tier franchise hierarchy with automated commission logic.
   - Built real-time revenue distribution to user wallets & admin dashboards.
   - Designed scalable database structures to handle thousands of network users.
   - Integrated secure login, roles, permissions, and audit logging.

   Live Links: https://egbest.org/ , **https://yehm.online/** and **https://kulsoftherbal.com/**

4. **Recharge Portal & Wallet System**

   Core PHP, MySQL, AJAX

   - Integrated multiple recharge APIs with real-time status tracking & retry logic.
   - Built authentication, wallet top-up, and transaction history systems.

SOFT SKILLS

Team Collaboration • Problem Solving • Attention to Detail • Communication • Time Management

EXPECTED ROLE

Seeking a **Full-Time PHP/Laravel Developer or Backend Engineer** role in scalable backend systems, API engineering, and feature-rich application development.
